Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 34 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 34 cites precisely the same limitations as the claim upon which it depends, Claim 31. As it has failed to further limit the claim upon which it depends, it is rejected as being indefinite. Furthermore, Claim 34 refers to Claim 31 as claiming a process, when it is claiming a composition. Thus, there is also a lack of antecedent basis.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 19-37 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nishihara (U.S. Patent No. 5,990,381).

The Nishihara patent teaches a biomedical material comprising shark-derived collagen and methods of making thereof. The biomedical material is useful for various purposes,

Art Unit: 1615

including artificial skin, artificial tendon, artificial bone, and surgical sutures (See Abstract).

The disclosed materials may comprise additional ingredients, such as hyaluronic acid, chondroitin sulfate, nucleic acids, amino acids, anti-microbial agents, antibiotics, chitin, chitosan, and polyurethane (See Column 6, Line 19 to Column 7, Line 35). In one embodiment, a phosphoric solution was added to a collagen solution. An aqueous calcium hydroxide solution was then added to this mixture to obtain an aqueous suspension. The precipitate was then filtered and then freeze-dried (See Example 4).

Although the reference is silent with respect to process viscosities, pH, and concentration of the bio-polymer, it is the position of the examiner that these claim limitations are not critical to the function of the invention, and furthermore, they are made obvious over the implicit and inherent disclosure of the prior art. The examiner shifts the burden to the applicant to demonstrate otherwise. Similarly, it is the position of the examiner that the particular selection of sodium bicarbonate in the instantly claimed process is not considered to be critical to its function. The examiner shifts the burden onto the applicant to demonstrate the criticality of this particular feature. Claims 35-37 are drawn to what the examiner has determined to be future intended uses of the product made by the instantly claimed process. As such, they are not given patentable weight by the examiner.

Thus, the instantly claimed invention is *prima facie* obvious.
